DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Novak et al (Hereafter, Novak), U.S. Pat. No. 7,219,308.

Regarding claim 1, Novak teaches a method performed by at least one information handling system, the method comprising:

receiving an excerpt of information, and in response to a configuration of the information handling system, performing at least one of the following operations: automatically translating the excerpt from an XML format into a non-XML format, so that the translated excerpt is compatible for operation with the information handling system; and automatically translating the excerpt into an alternate XML format, so that the translated excerpt is compatible for operation with the information handling system (= converting media file to a format compatible with media player program) [see Col. 10, Lines 48-67].

Regarding claim 2, Novak further teaches the method of claim 1, wherein the excerpt is an item of music [see Figs. 2-3].

Regarding claim 3, Novak further teaches the method of claim 1, wherein the configuration is specified by one or more files of the information handling system [see Figs. 2-3].

Regarding claim 4, Novak further teaches the method of claim 1, wherein the excerpt has a generic XML format, and wherein automatically translating the excerpt into the XML format comprises automatically translating the excerpt from the generic XML format into the alternate XML format [see Col. 10, Lines 48-67].

Claims 5-8 are rejected under the same rationale set forth above to claims 1-4, respectively.

Claims 9-12 are rejected under the same rationale set forth above to claims 1-4, respectively.
